PROFESSIONAL SUMMARY

AI and Data Science postgraduate (MSc) with a First-Class BEng (Hons) in Software Engineering and 2+ years of professional experience designing scalable, production-grade systems. Strong expertise in Machine Learning, NLP, and AI-powered application development using Python, Scikit-learn, TensorFlow, and PyTorch. Experienced in building end-to-end AI solutions including data preprocessing, model training, evaluation, API deployment, and database integration. Combines deep software engineering discipline with applied AI to deliver robust, maintainable, and real-world intelligent systems.

PROFESSIONAL EXPERIENCE

Full-Stack Developer, VisualSoft (Pvt) Ltd

10/2023 – 12/2025

- Designed, developed, and maintained ERP-based web applications using modern full-stack technologies.
- Worked across both front-end and back-end layers, contributing to system architecture, feature development, and bug fixes.
- Optimized SQL queries and database schemas to improve system performance and reliability.
- Built RESTful APIs and integrated them with frontend systems to support secure data exchange.
- Implemented structured validation and business rule automation to enhance operational efficiency.
- Followed clean code principles, version control best practices, and participated in peer code reviews.

PROJECTS

MealMinder AI-Based Dietary Management System,

2024 – 2025

Python | Flask | TensorFlow | React.js | MySQL

- Developed a computer vision-based dietary management system for food detection and nutritional estimation.
- Built preprocessing pipelines for image normalization and feature extraction.
- Integrated USDA nutritional dataset API for real-time macro and calorie breakdown.
- Designed recommendation logic for users with diabetes and hypertension.
- Deployed trained models via Flask REST API for real-time inference.

TravelMate AI-Powered Travel Chatbot, Python | Flask | PyTorch | NLTK | SQLite

2025

- Built a conversational chatbot providing travel tips, itineraries, and recommendations.
- Trained with a custom intent dataset for travel-related queries.
- Implemented context-aware logic to maintain dialogue flow.
- GitHub: TravelMate

GasByGas Online Gas Requesting & Delivery System, React | React Native | Next.js | MySQL

2025

- Designed a multi-role delivery platform connecting customers, outlets, and head office.
- Implemented OTP-based token verification and real-time stock updates.
- Built responsive mobile-first system with API integration for secure delivery handling.
- GitHub: GasByGas

FinBuddy AI-Powered Banking Chatbot , <i>Python Flask PyTorch NLTK SQLite</i> - Developed an intent classification model using PyTorch for banking-related queries. - Implemented NLP preprocessing pipeline including tokenization, stemming, and vectorization. - Designed retrainable model architecture enabling incremental intent updates. - Integrated structured SQLite knowledge base for efficient response retrieval.	2024
DreamDay Wedding Planner Web Application , <i>C# ASP.NET MVC MySQL</i> - Developed a full-stack wedding event management system with role-based access for Admin, Users, and Vendors. - Implemented budget tracking, vendor bookings, guest list, and schedule management. - Built admin panel for monitoring activities and vendor approvals. - GitHub: DreamDay	2025
BookHaven Bookstore Management System , <i>C# WinForms Entity Framework SQL Server</i> - Developed a bookstore management desktop app with modules for inventory, suppliers, and sales. - Implemented role-based login with secure hashed credentials for Admin and Staff. - Generated reports in PDF/Excel using EPPlus and LINQ queries. - GitHub: BookHaven	2025
FlaskBlog Blog Management System , <i>Python Flask HTML CSS</i> - Developed a lightweight blogging platform with CRUD operations. - Implemented user authentication, login, and error handling. - Designed a simple, user-friendly interface for individual bloggers. - GitHub: FlaskBlog	2024

EDUCATION

MSc in Data Science and Artificial Intelligence , <i>Middlesex University Dubai</i>	2025 – Present
BEng (Hons) in Software Engineering First Class Honours , <i>London Metropolitan University</i>	2024 – 2025
Higher National Diploma (HND) in Software Engineering , <i>Esoft Metro Campus, Sri Lanka</i>	10/2022 – 02/2024
Diploma in Information Technology , <i>Esoft Metro Campus, Sri Lanka</i>	2021 – 2022

TECHNICAL SKILLS

Machine Learning & Artificial Intelligence: Python Scikit-learn TensorFlow PyTorch Supervised & Unsupervised Learning Model Training Validation & Evaluation Feature Engineering & Data Preprocessing Natural Language Processing (NLTK, Intent Classification) Model Deployment using Flask APIs
Data Science & Analytics: NumPy Pandas R Exploratory Data Analysis (EDA) Statistical Analysis Data Cleaning & Transformation
Programming Languages: Python C# JavaScript R SQL PHP
Frameworks & Libraries: React.js Next.js Node.js
Backend & API Development: Flask ASP.NET  MVC RESTful API Development API Integration
Databases: MySQL SQLite SQL Server Supabase Entity Framework
Tools & Development Environment: Jupyter Notebook Colab Git & GitHub Postman VS Code

AWARDS AND ACHIEVEMENTS

Most Outstanding Performance Award, BEng (Hons) in Software Engineering , <i>London Metropolitan University</i>	09/2025
Batch Top, Higher National Diploma (HND) in Software Engineering , <i>Pearson</i>	12/2023
